

Canned Olives - Consumer Insights Report

Consumer Profile & Usage Insights

This section includes:

- Experience in food industry
- Olive usage frequency
- Familiarity with olives
- Difference between bottled and canned olives
- Usage frequency in dishes
- Dish applications
- Benefits
- Purchase behavior
- Purchase drivers

Years of Experience in the Food Industry

Key Insights

- Professionals with **5–10 years (33%)** and **11–20 years (31%)** of experience make up the largest share overall, indicating a predominantly mid-career workforce.
- **Delhi** has the highest proportion of professionals with **11–20 years of experience (39%)**, reflecting a relatively experienced market.
- **Mumbai** records the highest share of professionals with **5–10 years (39%)** and **more than 20 years (26%)** of experience, while having the lowest proportion with **less than 5 years (13%)**.
- **Bangalore** displays the most balanced distribution of experience across all categories.

Frequency of Olive Usage for Professional Services

Key Insights

- **Daily olive usage (40%)** is the most common practice overall, indicating regular incorporation of olives into professional food preparation.
- **Delhi** has the highest daily usage (**57%**), highlighting stronger adoption compared to the other cities.
- **Mumbai** shows the highest proportion of professionals using olives **only a few days in a month (33%)**, suggesting comparatively lower usage frequency.
- **Rare usage remains limited across all cities (5–12%)**, indicating that olives are widely accepted for professional use.

Familiarity with canned/bottled olives

Key Insights

- **Nearly half of professionals (49%)** report being **very familiar** with different types of olives, while **30%** are **somewhat familiar**.
- **Mumbai** demonstrates the highest level of familiarity, with **60%** indicating they are **very familiar** and only **13%** reporting limited familiarity.
- **Delhi** also shows strong awareness, with **48%** being very familiar and **20%** having limited familiarity.
- **Bangalore** has the lowest proportion of professionals who are **very familiar (38%)** and the highest share with **limited familiarity (31%)**, suggesting greater potential for awareness-building initiatives.

Are Canned and Bottled Olives Considered Different?

Key Insights

- **A majority (58%)** believe that different types of olives **are different**, indicating broad recognition of product distinctions.
- **Delhi** shows the strongest perception of differentiation, with **80%** believing olive varieties are different.
- **Bangalore (55%)** and **Mumbai (51%)** have a higher proportion of professionals who perceive olive types as similar, indicating comparatively lower differentiation awareness.
- The findings suggest that while awareness of differences is generally positive, opportunities remain to further educate professionals in markets where perceptions of similarity are higher.

Frequency of Using Canned/Bottled Olives in Dishes

Key Insights

- **Almost half (46%)** use canned/bottled olives **every day** in their dishes.
- **Mumbai** has the highest daily usage (**54%**), followed by **Delhi (47%)**.
- **Bangalore** uses olives less frequently, with more professionals using them **2–3 times a week (32%)** instead of daily.
- Very few professionals use olives **only once a week (5%)**, showing that olives are a regular ingredient in most kitchens.

What types of dishes are canned/bottled olives used in?

● Salads ● Appetizers ● Pizzas ● Pasta ● Stuffing ● Main course dishes ● Sandwiches ● Cocktails ● To make Salsa ● To make Dips

Key Insights

- **Pasta (68%)** and **Pizza (65%)** are the most common dishes made with canned/bottled olives.
- **Salads (60%)** are also a popular choice, especially in **Delhi** and **Mumbai**.
- Olives are also commonly used in **Cocktails (53%)** and **Main Course dishes (47%)**, showing they are used in a variety of recipes.
- **Sandwiches, Salsa, and Dips** are less common but are still used by many professionals.
- **Delhi** shows the widest use of olives across different types of dishes.

Consumption/Usage of Canned Olives

Key Insights

- **Most professionals (62%)** consume canned olives.
- **Mumbai (70%)** has the highest consumption, followed by **Delhi (68%)**.
- **Bangalore (47%)** has the lowest consumption, showing room for growth.
- Only **16%** overall, do not use canned olives.

Most Frequently Mentioned Benefits of Olives

Key Insights

- **Better presentation (72%)** is the biggest benefit associated with olives overall.
- **Good nutrition (60%), better taste (59%),** and **health benefits (57%)** are also commonly mentioned.
- **Giving dishes a premium look (40%)** is the least mentioned benefit overall.
- **Delhi** gives the highest ratings for almost every benefit, especially **presentation (84%), taste (80%),** and **nutrition (76%)**.
- **Mumbai** and **Bangalore** show similar opinions, with presentation and health benefits being the most valued.

Most Important Benefit of Olives

Key Insights

- **Health benefits (26%)** are considered the most important benefit overall.
- **Good nutrition (26%)** is equally important, making these the top two reasons for using olives.
- In **Bangalore, good nutrition (42%)** stands out as the most important benefit.
- In **Delhi, better taste (30%)** is the top reason for using olives.
- In **Mumbai, health benefits (35%)** are the main reason professionals value olives.
- **Giving dishes a premium look** is the least important benefit across all cities.

Reasons for Disliking Canned Olives

Reasons ▼	Bangalore	Delhi	Mumbai	Overall
Varieties are not there (lack of range)	30	36	41	36
Not many brands presence to choose from	57	60	43	53
Low shelf life	37	55	34	42
Low availability	27	40	27	31
High price	50	40	33	41
Difficult to identify good product/brand	35	43	37	38

Key Insights

- **Limited brand choices (53%)** is the biggest reason professionals dislike canned olives.
- **Short shelf life (42%)** and **high price (41%)** are the next most common concerns.
- **Difficulty identifying a good brand (38%)** and **limited product variety (36%)** are also important challenges.
- **Low availability (31%)** is the least common concern overall.

City-wise Insights

- **Delhi** reports the highest concerns about **limited brand choices (60%)**, **short shelf life (55%)**, and **difficulty identifying a good brand (43%)**.
- **Bangalore** is most concerned about **high prices (50%)**.
- **Mumbai** reports fewer concerns overall, except for **limited product variety (41%)**.

Current Purchase Method for Canned/Bottled Olive

● Bangalore ● Delhi ● Mumbai ● Overall

Key Insights

- **Retail outlets (29%)** are the most preferred purchase channel overall.
- **Online platforms (e-commerce sites) (20%)** and **company websites (19%)** are also popular purchasing options.
- **Distributors (17%)** continue to play an important role in supplying canned olives.
- **Direct purchases from companies (7%)** and **independent vendors (8%)** are the least preferred channels.

City-wise Insights

- **Mumbai** relies heavily on **retail outlets (45%)**, the highest among all cities.
- **Bangalore** shows the highest preference for **online platforms** and **distributors**, indicating a more diverse purchasing pattern.
- **Delhi** has the highest proportion of purchases made **directly from companies (12%)** and through **independent vendors (15%)**.

Top Factors Influencing Olive Purchase Decisions

Key Insights

- **Freshness (48%)** and **Price (48%)** are the top factors considered when buying olives.
- **Brand reputation (46%)**, **discounts (42%)**, and **quality (41%)** also strongly influence purchase decisions.
- While many factors are considered, **quality (21%)** is the factor most often chosen as the **single most important** reason for purchase.
- **Packaging (25%)**, **seller recommendations (18%)**, and **expert advice (17%)** have the least influence on purchase decisions.

Most Important Choice Driver

Purchase Drivers	Bangalore	Delhi	Mumbai	Overall
Quality	28	13	22	21
Price	7	9	26	14
Freshness- Manufacturing date etc..	14	16	9	13
Discounts/offers	20	8	5	11
Brand name & reput	10	5	11	9
Ingredients information	9	10		6
Experience with the brand/product	5	9	4	6
Reviews of buyers online		5	10	5
Origin of the brand	1	13		5
Seller's recommendation	1	6	6	4
Take expert advices	1	5	6	4
Packaging	4	1		2

Key Insights

- **Quality (21%)** is the most important factor when choosing olives overall.
- **Price (14%)** and **freshness (13%)** are the next most important purchase drivers.
- **Discounts and offers (11%)** and **brand reputation (9%)** also play an important role.
- **Packaging (2%)** is the least important factor when making a purchase.

City-wise Insights

- **Bangalore** places the highest importance on **quality (28%)**, followed by **discounts (20%)**.
- **Delhi** gives greater importance to **freshness (16%)** and **quality (13%)**.
- **Mumbai** is the most **price-sensitive**, with **price (26%)** being the leading purchase driver, followed by **quality (22%)**.

Market Behavior & Usage Insights

Who Are the Professionals?

- **Mid-career dominance:** 5–20 years of experience make up 64% of the workforce
- Delhi has the most experienced professionals; Mumbai has the most diverse mix
- Bangalore shows the most balanced spread across experience levels

How Often Do They Use Olives?

- **40% use olives daily** in professional food preparation
- Delhi leads daily usage at 57%; Mumbai lags with more monthly-only users
- Rare usage is very low (5–12%), confirming wide professional acceptance

Awareness & Product Knowledge

- **49% are very familiar** with canned/bottled olives
- Mumbai leads familiarity (60%); Bangalore has the lowest (38%) — biggest opportunity for awareness campaigns
- **58% believe canned and bottled olives are different** products — Delhi leads this perception at 80%

Usage in Dishes

- **Top dishes:** Pasta (68%), Pizza (65%), Salads (60%)
- Also popular in Cocktails (53%) and Main Course (47%)
- Delhi shows the widest usage variety across dish types

Consumption & Purchase Behavior

- **62% consume canned olives** regularly; Mumbai highest at 70%, Bangalore lowest at 47%
- **Retail outlets (29%)** are the #1 purchase channel
- E-commerce (20%) and brand websites (19%) are growing fast
- Mumbai relies heavily on retail (45%); Bangalore prefers online and distributors

Why Do They Buy (or Not Buy)?

Top purchase drivers:

- Freshness & Price (48% each)
- Brand reputation (46%), Quality (41%)
- **Quality (21%) is the single most important decision factor**

Top reasons for disliking canned olives:

- Limited brand choices (53%)
- Short shelf life (42%)
- High price (41%)
- Difficulty identifying a good brand (38%)

Perceived Benefits

- **Better presentation (72%)** is the top overall benefit
- Health benefits and nutrition are top priority in Mumbai and Bangalore respectively
- Delhi values taste and presentation the most
- Premium appearance is the least valued benefit across all cities

Brand Funnel & Competitive Analysis

This section contains

- Brand awareness
- Brand salience
- Brand pyramid
- Source of awareness
- Trial ratio
- Retention ratio
- Brand funnel

Brand Salience: Overall

● TOM ● Spont ● Aided ● Total Awareness

Key Insights

- **Solivio (65%)** has the highest overall brand awareness, followed closely by **Olivara (61%)**.
- **Aurelia Olive Co. (57%)**, **Golden Press Olive Oil (56%)**, and **Terra Oliva (55%)** also enjoy strong awareness.
- **Olive Haven (42%)** and **Verde Grove (46%)** have moderate awareness, while the remaining brands have relatively low visibility.
- **Mediterranean Gold (4%)**, **Bella Olivina (2%)**, and **Olive Crest (0%)** have very limited brand awareness.

Brand Recognition Insights

- **Olivara** has the strongest **Top-of-Mind (TOM) awareness (23%)**, meaning it is the first brand that comes to mind for the largest share of professionals.
- **Solivio** benefits from the highest **spontaneous awareness (42%)**, indicating it is widely recognized without prompting.
- **Pure Grove Oils** has the highest **aided awareness (24%)**, suggesting many professionals recognize the brand when shown its name, but fewer recall it on their own.
- Brands with high aided awareness but lower spontaneous awareness have an opportunity to improve brand recall through stronger marketing and visibility.

Key Insights

- **Solivio** and **Olivara** are the strongest brands, leading across **awareness, consideration, preference, and unaided recall**.
- **Solivio** has the highest overall awareness (**65%**) and strong unaided recall (**56%**), indicating a well-established brand.
- **Olivara** is the most preferred brand (**22%**) and has the highest consideration (**37%**), showing strong customer preference.
- **Terra Oliva** and **Aurelia Olive Co.** have good awareness but lower preference, suggesting opportunities to convert awareness into stronger brand preference.
- **Olivelle Estates** has the weakest brand performance, with low awareness (**28%**), consideration (**5%**), and no brand preference.

Market-wise Brand Salience

Centre	Bangalore				Delhi				Mumbai				Overall			
Brand	TOM	Spont	Aided	Total Aware	TOM	Spont	Aided	Total Aware	TOM	Spont	Aided	Total Aware	TOM	Spont	Aided	Total Aware
Solivio	16	40	13	69	11	47	6	64	14	40	8	62	14	42	9	65
Olivara	25	28	3	56	21	35		56	24	43	5	72	23	35	3	61
Aurelia Olive Co.	9	27	19	55	9	36	20	65	6	29	17	52	8	31	19	57

Verde Grove	3	20	17	40	7	46	9	62	5	22	8	35	5	29	11	46
Olive Haven	5	22	14	39	7	45	3	54	9	22	3	34	7	30	7	42
Olivelle Estates	6	20	2	28	6	21	5	31	12	12	2	26	8	18	3	28

Key Insights

- **Solivio** has the highest overall brand awareness (**65%**) and performs consistently across all three cities.
- **Olivara** has the strongest presence in **Mumbai (72%)**, compared to **56%** in both Bangalore and Delhi.
- **Terra Oliva** is most recognized in **Delhi (73%)**, making it the leading brand in that market.
- **Aurelia Olive Co. (65%)** and **Verde Grove (62%)** also show stronger awareness in **Delhi** than in the other cities.
- **Pure Grove Oils** has the highest aided awareness in **Mumbai (30%)**, indicating stronger recognition when the brand name is shown.
- **Olivelle Estates** has the lowest brand awareness across all markets, with awareness ranging from **26% to 31%**.

City-wise Highlights

Bangalore

- **Solivio (69%)** is the leading brand.
- **Olivara (56%)** and **Aurelia Olive Co. (55%)** are the next most recognized brands.

Delhi

- **Terra Oliva (73%)** leads brand awareness.
- **Aurelia Olive Co. (65%)**, **Solivio (64%)**, and **Verde Grove (62%)** also have strong visibility.

Mumbai

- **Olivara (72%)** is the clear market leader.
- **Solivio (62%)**, **Golden Press Olive Oil (55%)**, and **Emerald Harvest (52%)** also enjoy strong awareness.

Source of Awareness

Key Insights

- **Solivio** has the highest overall brand awareness (**65%**) and performs consistently across all three cities.
- **Olivara** has the strongest presence in **Mumbai (72%)**, compared to **56%** in both Bangalore and Delhi.
- **Terra Oliva** is most recognized in **Delhi (73%)**, making it the leading brand in that market.
- **Aurelia Olive Co. (65%)** and **Verde Grove (62%)** also show stronger awareness in **Delhi** than in the other cities.
- **Pure Grove Oils** has the highest aided awareness in **Mumbai (30%)**, indicating stronger recognition when the brand name is shown.
- **Olivelle Estates** has the lowest brand awareness across all markets, with awareness ranging from **26% to 31%**.

Brand-wise Highlights

- **Solivio** benefits the most from **in-store visibility (40%)**, making it the strongest awareness source for the brand.
- **Terra Oliva** has strong awareness through both **the internet (33%)** and **in-store visibility (35%)**.
- **Olivara** is mainly discovered through **in-store visibility (33%)** and **the internet (25%)**.
- **Pure Grove Oils** also gains significant awareness from **in-store visibility (30%)**.
- **Olive Haven** relies more on **online sources (31%)** than most other brands.

Trial Ratio

Key Insights – Trial Ratio

- **Solivio** has the strongest trial conversion, with **73%** of people who are aware of the brand having tried it.
- **Terra Oliva (71%)** and **Verde Grove (70%)** also show excellent conversion from awareness to trial.
- **Olivara (65%), Aurelia Olive Co. (63%),** and **Golden Press Olive Oil (62%)** maintain healthy trial ratios, indicating good consumer acceptance.
- **Olive Haven (60%)** performs reasonably well, with more than half of aware consumers trying the brand.
- **Emerald Harvest (47%)** converts less than half of its aware audience into trial, suggesting room for stronger activation.
- **Olivelle Estates (38%)** has relatively low trial despite moderate awareness.
- **Pure Grove Oils** has the weakest performance, with only **20%** of aware consumers having tried the brand, highlighting a significant gap between awareness and trial.
- Overall, brands with higher awareness generally achieve higher trial, but the conversion rate varies considerably, indicating opportunities to improve trial through sampling, promotions, and better retail visibility.

Retention Ratio

Retention Ratio – Key Insights

- **Solivio** has the strongest retention, with **60%** of people who considered the brand also preferring it.
- **Olivara** follows closely with a **59%** retention ratio, showing strong customer preference after consideration.
- **Olive Haven** records a **53%** retention ratio despite having a smaller consideration base.
- **Aurelia Olive Co.** and **Golden Press Olive Oil** both retain **48%** of those who consider the brand.
- **Verde Grove** (**43%**) and **Terra Oliva** (**42%**) have moderate retention, indicating room to convert more consideration into preference.
- **Emerald Harvest** has the weakest retention at **20%**, suggesting it struggles to become a preferred choice despite being considered by consumers.

Market-wise Retention Disposition

Olive Haven	11	5	13	12	22	10	43	39	14	10	20	17	16	8	25	23
Olivelle Estates	5		12	10	7	1	12	8	3		8	6	5	0	11	8
Pure Grove Oils			10				12				7				10	
Solivio	41	27	50	46	28	11	47	38	36	25	45	42	35	21	47	42
Terra Oliva	28	11	34	30	44	17	58	54	19	10	24	22	30	13	39	35
Verde Grove	21	13	33	24	37	11	47	42	12	6	16	15	23	10	32	27

Key Insights

- **Solivio** and **Olivara** have the strongest brand funnels, converting consideration into preference and regular consumption effectively.
- **Terra Oliva** and **Aurelia Olive Co.** show good trial and repeat usage but have scope to improve brand preference.
- **Golden Press Olive Oil** and **Verde Grove** are tried by many consumers but have relatively lower preference.
- **Emerald Harvest** and **Olivelle Estates** have the weakest funnel performance, with low consideration and preference.
- **Mumbai** is led by **Olivara**, while **Solivio** performs consistently well across all three markets.

Brand Health & Competitive Landscape

Overall Brand Awareness

Brand - Total Awareness

Solivio - 65%

Olivara - 61%

Aurelia Olive Co. - 57%

Golden Press Olive Oil - 56%

Terra Oliva - 55%

- **Olivara** has the strongest Top-of-Mind (TOM) recall (23%)
- **Solivio** leads in spontaneous awareness (42%)
- **Mediterranean Gold, Bella Olivina, Olive Crest** have very weak visibility

Brand Pyramid (Awareness → Preference)

- **Solivio & Olivara** are the clear market leaders across all funnel stages
- **Olivelle Estates** is the weakest — low awareness, near-zero preference
- Terra Oliva & Aurelia Olive Co. have awareness but struggle to convert to preference

Trial & Retention

Trial Ratios (Aware → Ever Tried):

- Solivio: **73%** (best)
- Terra Oliva: **71%**, Verde Grove: **70%**
- Pure Grove Oils: Only **20%** — biggest gap between awareness and trial

Retention Ratios (Considered → Preferred):

- Solivio: **60%**, Olivara: **59%** (top two)
- Emerald Harvest: Only **20%** — weakest retention

City-wise Brand Leadership

City - Leading Brand

Bangalore - Solivio (69%)

Delhi - Terra Oliva (73%)

Mumbai - Olivara (72%)

How Are Brands Discovered?

- **In-store visibility** is the #1 awareness source across most brands
- Solivio benefits most from in-store presence (40%)
- Terra Oliva and Olivara also leverage internet channels strongly
- Olive Haven relies more on online discovery than peers

Product Evaluation & Pricing

This section includes

- Unipolar Analysis
- Bipolar Analysis
- Comparison with regular brand
- Purchase intention
- Price Sensitivity Meter

Unipolar Analysis

Attribute

Overall Appeal

Bipolar Analysis

● Definitely Would Not Buy ● Probably Would Not Buy ● Might or Might Not Buy ● Probably Would Buy ● Definitely Would Buy ● Mean Score Overall

Optimal Price Point (OPP)

189

Indifference Price Point (IPP)

201

Point of Marginal Cheapness (PMC)

181

Point of Marginal Expensiveness (PME)

210

Price Sensitivity Meter

Price Sensitivity Meter – Key Insights

- The **Optimal Price Point (OPP)** is ₹189, indicating the price at which consumers are least likely to perceive the product as either too cheap or too expensive.
- The **Indifference Price Point (IPP)** is ₹201, suggesting consumers generally view this as a fair and acceptable price.
- The acceptable price range lies between the **Point of Marginal Cheapness (PMC)** of ₹181 and the **Point of Marginal Expensiveness (PME)** of ₹210.
- Pricing **below ₹181** may lead some consumers to question the product's quality, while pricing **above ₹210** increases the likelihood of the product being seen as too expensive.
- The range of ₹189–₹201 appears to be the strongest pricing zone, balancing value perception with willingness to pay.

Product Feedback & Pricing

Overall Product Appeal

- Mean score: **4.1–4.3 / 5** across all cities — strong positive reception
- Mumbai gives the highest rating (4.3); Bangalore and Delhi at 4.2 and 4.1

Texture Feedback

- **84% say texture is "Just About Right"** overall
- Very low dissatisfaction — product texture is a strength

Comparison with Regular Brand

- **40% say the product is "Slightly Better"** than their regular brand
- Mean score: 4.0–4.2 — competitive positioning is solid
- Mumbai rates it highest (4.2) vs competitors

Purchase Intention

- **Mean score: 3.9–4.1** — strong positive intent to purchase
- Mumbai shows slightly lower intent (3.9) despite high consumption — price sensitivity likely a factor

Price Sensitivity Analysis (Van Westendorp Model)

Price Point - Value

Optimal Price Point (OPP) - **₹189**

Indifference Price Point (IPP) - **₹201**

Acceptable Range - **₹181 – ₹210**

- **Sweet spot pricing: ₹189–₹201**
- Below ₹181 = quality perception risk
- Above ₹210 = too expensive perception kicks in

Top 5 Strategic Takeaways

1. **Solivio and Olivara** dominate — all other brands must sharpen differentiation
2. **Bangalore is the biggest untapped opportunity** — low consumption, low familiarity, low brand preference
3. **Limited brand choices and short shelf life** are the two most fixable pain points
4. **Retail presence drives awareness** — in-store visibility is more powerful than ads
5. **Price the product between ₹189–₹201** for maximum market acceptance
